ABOUT ME

Hi, my name is Mahdi. Learning new technologies is what I do for a living. I have been in several departments of software development and I enjoy writing solid Java and fun Javascript code. I enjoy it so much that anyone around thinks I'm proactive.

EXPERIENCE

ANDROID DEVELOPER - YELP

London, United Kingdom | Sep 2021 - Current

- Creating and maintaining new and current types of ads on Yelp home page
- Refactoring, testing and extending the functionalities of the Yelp server driven UI framework.

SOFTWARE ENGINEER - HOSPITAD

Stockholm, Sweden (Remote) | Jul 2020 - Jul 2021

Hospitad is a data-focused start-up concerning the food industry based in Stockholm. My main role was providing the RESTful APIs in the Quarkus/Java application and generating different types of reports from the PostgreSQL database and picking Flutter for our brand new cross platform application, since it delivers better performance than other technologies and Dart is a better tool for UI development compared to JavaScript.

ANDROID DEVELOPER - HAMSAA

Tehran, Iran | Jan 2019 - Jul 2020

Hamsaa is an enterprise communication platform. I initiated migrating the android app codebase to Kotlin and Jetpack libraries. Developing a full-feature instant messaging module using the latest and the best of technologies of the time was my most important task. I also reduced the package size of the android app by 60% after multiple phases of refactoring.

FRONTEND DEVELOPER - ARMAN RAYAN SHARIF

Tehran, Iran | Jan 2018 - Jan 2019

Created a management dashboard for a code camp that our company was doing in different universities.

EDUCATION

BSC COMPUTER ENGINEERING - DROPPED OUT

Amirkabir University of Technology | Jun 2017 - Jan 2020

PROJECTS

FOURSQUARE CLONE

Kotlin, Koin, Location Services, Navigation | May 2020 - Jun 2020

A (very)simple FourSquare clone which integrates its remote API, listing places around with offline first and location based revalidation.
